SPEAKMAN
SAFETY PRODUCTS

...Quality Your Life Can Depend On

Since introducing the first emergency shower for industrial safety in 1939, Speakman emergency products have been serving dependably with important advantages.

- Patented Impeller Action Deluge Shower Heads swirl the water to soften impact and provide larger coverage area for more thorough cleansing action. IMPORTANT.
- Aerated water flows from Speakman Eye/Face Washes and gently follows the contours of the eyes and face to give complete coverage — unlike harsh streams that hit and splash away. Aeration also provides peroxide effect that picks up harmful particles. IMPORTANT.
- Standard use of full flow fittings ensures maximum delivery of water to affected area. IMPORTANT.
- Non-clogging Multispray Shower Heads use special angled face plate holes and contain integral volume regulators. IMPORTANT.
- Electrically Heated Showers maintain water at elevated temperatures to resist freezing to -20°F. Optional to -40°F. IMPORTANT.

Call or send for the Speakman Catalog of Quality Safety Products.
